

VIAN SURYAJAYA

Mobile Developer · Flutter & AI Integration · Product Development

Taipei, Taiwan · 0902-337-344 · viansuryajaya37@gmail.com · github.com/viansuryajayaa

Languages: English (professional) · Mandarin (conversational) · Indonesian (native)

PROFESSIONAL SUMMARY

Flutter mobile developer with hands-on experience building end-to-end applications, including a multi-vendor marketplace and an AI-integrated LINE assistant. Focused on delivering user-facing mobile products with real-world utility.

TECHNICAL SKILLS

Mobile: Flutter / Dart (AI-assisted development, proficient in review & debugging)

Backend: Firebase (Firestore, Auth, Storage), Flask, REST API

AI / APIs: Gemini API, Webhook integration, Tool calling / function calling

Languages: Dart, Python, C++

Tools: Git, Postman, Figma, Linux

Concepts: Real-time systems, State management (GetX), OTP auth, Session management

TECHNICAL PROJECTS

衣速達 (Yisuda) — Multi-Vendor Laundry Marketplace App | Flutter · Firebase · GetX

- Designed and built a marketplace-style mobile application connecting customers with laundry vendors, inspired by food delivery platform UX
- Architected a dual-role system (customer and vendor) within a single Flutter codebase using GetX state management
- Built real-time order tracking and bidirectional messaging using Firebase Firestore, supporting concurrent vendor-customer sessions
- Designed end-to-end user flow covering service selection, delivery tracking, and OTP-based identity verification

SIMY — AI Personal Assistant (LINE Bot) | Python · Flask · Gemini API

- Built a LINE-integrated AI assistant exploring practical AI usage in everyday messaging environments
- Implemented webhook-based real-time interaction handling user text and image input with low-latency responses
- Integrated backend tool calling for Google Calendar event creation directly from chat commands
- Managed session-based conversation history and response formatting for consistent multi-turn usability

EDUCATION

National Dong Hwa University (NDHU) | Hualien, Taiwan

B.Sc. Computer Science & Information Engineering — Expected 2026

Relevant coursework: Data Structures, Algorithms, Operating Systems, Software Engineering, Mobile Application Development, Machine Learning, Deep Learning, Generative AI

HONORS & ACHIEVEMENTS

AI First Prize — Talent Circulation Alliance (TCA), Taiwan

- Won 1st place via jury presentation at TCA's AI competition; built a data visualization tool analyzing nurse turnover patterns to support hospital HR decision-making, presented to a panel of industry judges
